ANNEX I

**Structure and content of a national strategy for sustainable operational programmes as referred to in Article 2**

*1. Duration of the national strategy*

*To be indicated by the Member State.*

*2. Analysis of the situation in terms of strengths and weaknesses and potential for development, the strategy chosen to meet them and the justification of the priorities chosen as referred to in Article 36(2)(a) and (b) of Regulation (EU) No 1308/2013.*

*2.1. Analysis of the situation Description of the current situation of the fruit and vegetable sector using quantified data, highlighting strengths and weaknesses, disparities, needs and gaps and potential for development on the basis of the relevant indicators set out in point 4.1 of Annex II. This description shall concern at least: — the performances of the fruit and vegetables sector: strengths and weaknesses of the sector, competitiveness and the potential for development of the producer organisations; — the environmental effects (impacts, pressures and benefits) of the fruit and vegetables production, including key trends.*

*2.2. The strategy chosen to meet strengths and weaknesses Description of the key areas where intervention is expected to bring the maximum value added: — relevance of the objectives set for the operational programmes, of the expected results and the extent to which they can be realistically achieved; — internal coherence of the strategy, existence of mutually reinforcing interactions and possible conflicts or contradictions between the operational objectives of different actions selected; — complementarity and consistency of the actions selected with other national or regional actions, and with activities supported through Union funds, in particular with the rural development and promotion programmes; — expected results and impact compared to the baseline situation and their contribution to Union objectives.*

*2.3. Impact from the previous national strategy (where applicable) Description of results and impact of operational programmes implemented in the recent past.*

*3. Objectives of operational programmes and performance indicators as referred to in Article 36(2)(c) of Regulation (EU) No 1308/2013 Description of the types of actions selected as eligible for support (non-exhaustive list), the objectives pursued, the verifiable targets and the indicators that allow the progress towards achievement of the objectives, efficiency and effectiveness to be assessed.*

*3.1. Requirements concerning all or several types of actions Member States shall ensure that all the actions included in the national strategy and in the national framework are verifiable and controllable. Where the assessment during the implementation of the operational programmes reveals that the requirements of verifiability and controllability are not met, the actions concerned shall be adjusted accordingly or deleted. Where support is granted on the basis of standard flat rates or scales of unit costs, Member States shall ensure that the relevant calculations are adequate and accurate and established in advance on the basis of a fair, equitable and verifiable calculation. Environmental actions shall comply with the requirements set out in Article 33(5) of Regulation (EU) No 1308/2013.*

*Member States shall adopt safeguards, provisions and checks for ensuring that actions selected as eligible for support are not also supported by other relevant instruments of the common agricultural policy, in particular by rural development and promotion programmes or other national or regional schemes. Effective safeguards in place pursuant to Article 33(6) of Regulation (EU) No 1308/2013, to protect the environment from possible increased pressures coming from investments supported under operational programmes, and eligibility criteria adopted pursuant to Article 36(1) of that Regulation, for ensuring that investments on individual holdings supported under operational programmes respect the objectives set out in Article 191 TFEU and in the seventh Union environment action programme.*

*3.2. Specific information required for types of actions aimed at the attainment of the objectives set out or referred to in Article 33(1) of Regulation (EU) No 1308/2013 (to be filled only for the types of actions selected)*

*3.2.1. Acquisition of fixed assets — types of investments eligible for support, — other forms of acquisition eligible for support, e.g. renting, leasing, — details on eligibility conditions for support.*

*3.2.2. Other actions — description of the types of actions eligible for support, — details on eligibility conditions for support.*

*4. Designation of competent authorities and responsible bodies Designation by the Member State of the national authority responsible for the management, monitoring and evaluation of the national strategy.*

*5. A description of the monitoring and evaluation systems*

*The performance indicators set out by the national strategy shall comprise the indicators provided for in Article 4 and listed in point 4.1 of Annex II. Where deemed appropriate, the national strategy shall specify additional indicators reflecting national or regional needs, conditions and objectives specific to the national operational programmes.*

*5.1. Assessment of the operational programmes and reporting obligations for producer organisations as referred to in Article 36(2)(d) and (e) of Regulation (EU) No 1308/2013.*

*Description of the monitoring and evaluation requirements and procedures in relation to operational programmes, including the reporting obligations for producer organisations.*

*5.2. Monitoring and evaluation of the national strategy Description of the monitoring and evaluation requirements and procedures in relation to the national strategy.*

## ANNEX II

### Annual Report Part A

#### STRUCTURE OF THE ANNUAL REPORT – PART A

These forms constitute the part A of the annual report that the competent authorities of the Member states are required to transmit to the European Commission by 15 November each year in the year following the calendar year covered by the report.

These forms are based on the reporting requirements set out in Article 54(b) and in Annex V to Commission Delegated Regulation (EU) 2017/891, laying down detailed rules for the application of Regulation (EU) No 1308/2013 in respect of the fruit and vegetables and processed fruit and vegetables sectors.

### ***Region codes***

Vlaams Gewest	BE2
Région Wallonne	BE3

The indication of the region concerned on the cover page of each section and at the beginning of each table is an option for any Member State that finds it more appropriate to provide a regional breakdown.

### ***Code number (ID) of POs, TPOs, APOs, TAPOs and PGs***

The code number of each PO, TPO, APO, TAPO or PG is UNIQUE. If a PO, TPO, APO, TAPO or PG has its recognition withdrawn, the same code number should never be used again.

### ***Monetary values***

All monetary values should be expressed in Euro, except for those Member States that use a national currency. A "NATIONAL CURRENCY" box is present at the TOP of Tables.

<b>Currency</b>

# SECTION 4

## MONITORING OF OPERATIONAL PROGRAMMES

The indicators related to actions undertaken by recognised producer organisations, associations of producer organisations, transnational organisations and producer groups under an operational programme / recognition plan does not necessarily capture all the factors that may intervene and affect the outputs, results and impact of an operational programme / recognition plan. In this context, the information provided by the indicators should be interpreted in the light of quantitative and qualitative information relating to other key factors contributing to the success or failure of the programme/plan's implementation.

**Table 4.1. Indicators as regards POs, TPOs, APOs and TAPOs**

It is proposed that the main types of 'quality schemes' cover the following: (a) certified organic production; (b) protected geographical indications and protected designations of origin, (c) certified integrated production, (d) private certified product quality schemes.

<sup>8</sup> Each day of a promotion / communication campaign counts as one action.

		Number of holdings				
		Difference of volume (m <sup>3</sup> ) (1.1. / 31.12)				
Actions to conserve soil		Area under fruit and vegetable production at risk of soil erosion where anti-erosion measures are implemented (ha) <sup>9</sup>				
		Number of holdings				
		Difference of fertiliser use per ha (tonnes / ha) (1.1. / 31.12)				
Actions to create or maintain habitat favourable for biodiversity or to maintain the landscape, including the conservation of historical features		Area concerned by actions contributing to habitat and biodiversity protection (ha)				
		Number of holdings				
		Area under fruit and vegetable production subject to reduction in use (ha)				
		Number of holdings				
		Difference of energy consumption (1.1. / 31.12):				
		Solids	(tonnes / volume of marketed production)			
		Liquids	(L / volume of marketed production)			
		Gas	(m <sup>3</sup> / volume of marketed production)			
Actions favouring energy saving (excluding transport)		Electricity	(kwh / volume of marketed production)			

<sup>9</sup> 'At risk of soil erosion' shall mean any sloping plot with an inclination higher than 10 %, whether or not anti-erosion measures (e.g. soil cover, crop rotation, etc.) have been taken. Where the relevant information is available, a Member State may instead use the following definition: 'At risk of soil erosion' shall mean any plot with a predicted loss of soil exceeding the rate of natural soil formation, whether or not anti-erosion measures (e.g. soil cover or crop rotation) have been taken.

Action related to reduction of waste production and to improve waste management		Number of holdings				
		Difference of volume of waste ( $m^3$ / volume of marketed production) (1.1. / 31.12)				
		Difference of volume of packaging ( $m^3$ / volume of marketed production) (1.1. / 31.12)				
Transport		Difference of energy consumption (1.1. / 31.12):

<sup>10</sup> Actions relating to the setting up / refilling of different mutual funds count as different actions.

<sup>11</sup> Market withdrawal of the same product in different periods of the year and market withdrawals of different products count as different actions. Each market withdrawal operation for a given product counts as one action.

<sup>12</sup> Green-harvesting and non-harvesting of different products count as different actions. Green harvesting and non-harvesting of the same product count as one action, regardless of the number of days they take, the number of holdings participating and the number of plots or hectares concerned.
